

# XTRACTOR – USER GUIDE

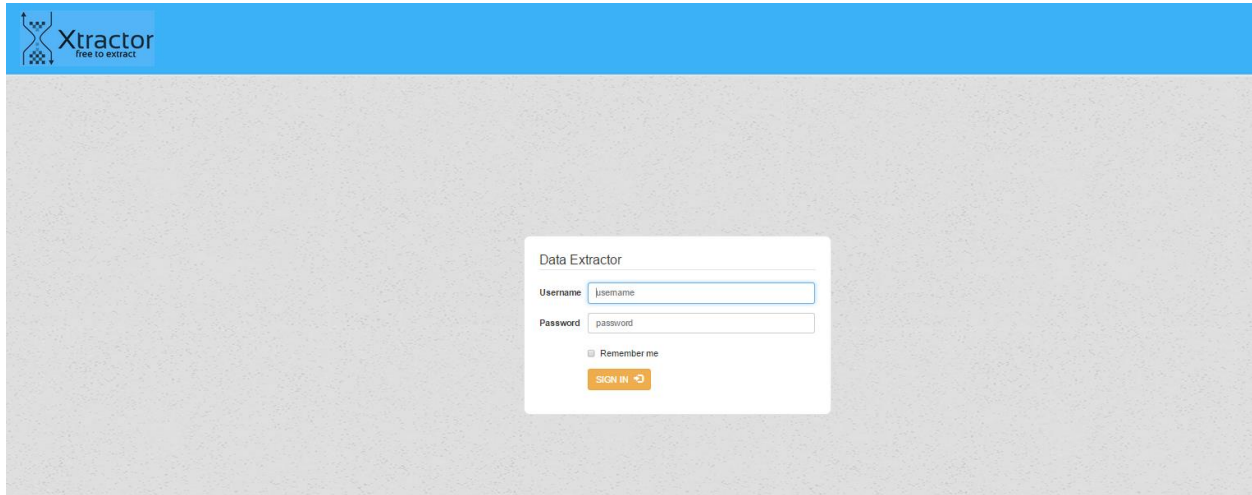

Lashan Silva

ENHANZER INNOVATION (PVT) LTD

## Table of Contents

1. User Sign In .....	2
2. Create Document Categories .....	3
3. Create New Template .....	4
4. Defining the Template Regions.....	5
5. Extracting a document .....	10

## 1. User Sign In

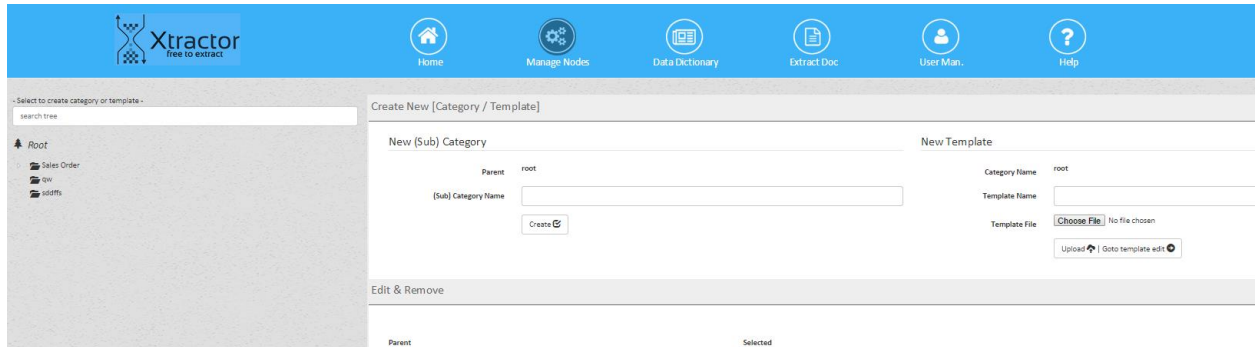

The screenshot shows the Xtractor user sign-in interface. At the top left, the Xtractor logo is displayed with the tagline 'free to extract'. The main area is a light grey background. Centered on this background is a white rectangular sign-in form. The form is titled 'Data Extractor' and contains the following elements: a 'Username' label followed by a text input field containing the text 'username'; a 'Password' label followed by a text input field containing the text 'password'; a checkbox labeled 'Remember me'; and an orange 'SIGN IN' button with a right-pointing arrow icon.

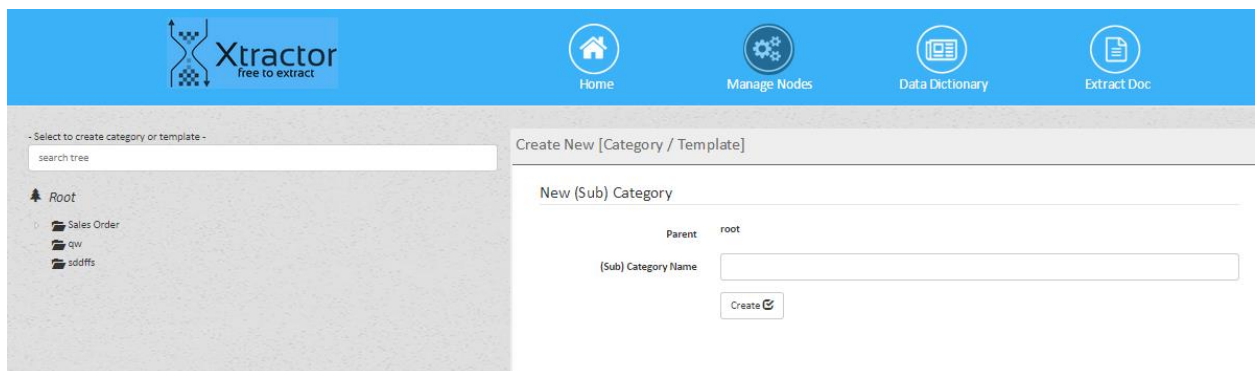

- Provided Username & Password can be used for log into the system

## 2. Create Document Categories

- First select the “Manage Nodes” tool button from the tool bar.

- From the Left Side select the document parent node
- Then in the new (sub) Category section type the new category name and click create button

### 3. Create New Template

#### New Template

Category Name

root

Template Name

Template File

Choose File

No file chosen

Upload 

Goto template edit 

Delete Parent

Delete Selected

- In the “Mange Nodes” page there is a new template section, first select the correct document category from the left side document category hierarchy, and then type appropriate template name
- After that you need to upload the source document under template file and then, finally click the upload button, it will redirect you to a new template creation page

## 4. Defining the Template Regions

- In your case there are two tool bar buttons we need to use to extract document information
  - Regex
  - Pattern
- First Select the Regex tool button

complete pattern element

- Then finally press save button

- And after that click the Save Template button

## 5. Extracting a document

- Select the “Extract Doc” button from the toolbar

The screenshot shows the 'Extract Doc' interface. At the top is a blue toolbar with icons for Home, Manage Nodes, Data Dictionary, Extract Doc (active), User Man., and Help. The main content area is divided into two sections. On the left, 'Select a Template' includes a search tree with a tree view showing 'Root', 'Sales Order', 'qw', and 'sddffs' (selected). On the right, 'Upload a PDF and extract' contains a message: 'Selecting a Template (from the left) is required for extract a PDF file. If cannot see any template, goto "Create a New Template"'. Below this, 'Selected Template' shows an error: 'Node you selected is not a Template!'. 'Parent Category' is empty. There is a 'Document Identification Name' input field. Below it, 'Select PDF file' has a 'Choose File' button and 'No file chosen' text. At the bottom of this section are 'Upload' and 'Extract' buttons. At the very bottom of the interface is a grey box labeled 'Extracted Data For Pdf ID'.

- Select the template from the left site template hierarchy
- And user can type a document identification name for future usage, and select the document and finally click the “Upload | Extract” button”
- Then document will be extracted and save in the database, and same time user will be see a output of extracted data under the “Extracted Data”

Extracted Data For Pdf ID
